TRAINING FOR LIGHTING PROFESSIONALS
FROM SEPTEMBER 2016
Welcome to the TRILUX Akademie

Lighting professionals in the UK can now benefit from the international success of the TRILUX Akademie. Since September 2015, the new Akademie site in Chelmsford has been offering training on the very latest topics in the light and lighting sector.

Providing knowledge, reducing complexity and establishing expertise is the aim of the TRILUX Akademie. The demands of bespoke lighting solutions are increasing continuously with the rapid advancement in LED technology, including optimisation for ever more diverse and specific applications, higher energy efficiency requirements, new regulations, as well as increased customisation.

Light has become intelligent, activating, relaxing or transformative, and the latest specialist knowledge is vital to optimise the possibilities created by new products and applications. With an up-to-date CPD seminar menu, practical seminars, webinars and theme days, we can support you in finding your way in the world of light, within this dynamic market.

Our training is aimed at architects and designers, electrical consultants and contractors and everyone concerned in a professional way with light, with the aim of simplifying your daily work. All those evaluating, operating, purchasing and using lighting systems in companies will benefit from our practical training programme. In addition, the TRILUX Akademie is the perfect forum for networking between specialists and colleagues.

Is there something missing from our existing programme that you would like to learn more about? Simply contact us – we’d be glad to expand our offering.

We look forward to seeing you!

Rebecca Ryan
Head of Akademie
TRILUX LIGHTING LTD UK

Richard Holt
Managing Director
TRILUX LIGHTING LTD UK
**Theme days**

How do you best gain an overview and detailed insights into a complex specialist theme?

With the TRILUX theme days. These offer participants a complete view of a specific technical area on one day and communicate valuable, compact expertise.

During this day, experts offer intensive and perhaps controversial insights from various angles, and there’s enough time after each expert lecture for discussions and the exchange of information. The mixed groups of participants from diverse professional backgrounds make the theme days the perfect platform for networking among colleagues – and for looking beyond your own horizon.

**Seminars**

Highly practical know-how direct from the experts – TRILUX Akademie seminars focus primarily on providing you with optimum specialist support for any challenge. Seminars are carried out by specialists with many years of professional experience, communicating their specialist knowledge in a comprehensible and practical way.

The exchange of information, discussions and interactivity are focused on achieving optimum learning and training effects. The small group sizes, usually 10 to 15 participants, ensure individual supervision and a good working atmosphere.
Lunchtime Seminars (CPD)
The latest lighting knowledge for your employees: we’d be glad to individually organise CPD seminars on-site at your company. These seminars are hosted by highly qualified technical experts trained for teaching. They usually take one hour, are free, and all participants are given a CPD certificate.

Webinars
Education and training conveniently from your home office or workplace: online seminars by TRILUX Akademie are not only highly convenient but also reduce effort in terms of travel, time and costs. Participants are trained in virtual seminar rooms on the latest light and lighting themes, in less than one hour.

To fully exploit the possibilities of this online format, events are carried out by technical specialists having supplementary training as certified e-trainers. An important methodological element of the webinars is interactivity, meaning that online participants also have the opportunity to ask specific questions about the topic.

**Participation fee / additional benefits**

free
These year’s TRILUX Theme Event in Manchester will focus on the role that Lighting will play in the Digital Revolution. Featuring expert speakers from TRILUX as well a guest speaker, still to be announced, the event will deliver valuable insights into the future of Lighting.

**Target group**  
Lighting designers, electrical consultants, architects and everyone interested in implementing lighting.

**Number of participants**  
Maximum of 80

**Contents**
- Overview of future Lighting Technologies
- How the digital revolution is helping us, reconnect with our biological needs
- How to avoid Manual Override: No Technology for the Sake of Technology
- Security and Integration: Avoiding the headache

**Dates/time**  
Thursday, 27/10/2016  Manchester  6.00-8.00 pm

Registrations and further locations/dates at www.trilux-akademie.com

**Booking number:** TGDE0534  
**Participation fee / additional benefits:** free

TGDE0534
**PLANNING OF INDOOR LIGHTING WITH DIALUX FOR BEGINNERS**

**Target group**  
Lighting designers, electrical consultants, contractors and facility managers

**Number of participants**  
Maximum of 15

**Preconditions of the seminar**  
Basics for planning indoor lighting or comparable expertise

**Learning aim**  
The seminar will teach you the essential basics of planning indoor lighting systems using DIALux planning software. Relevant planning stages will be carried out with the help of examples including the definition of planning projects, the identification and definition of required input parameters and the use of simplified planning possibilities and rapid result documentation.

**Contents**  
- EN 12464-1 planning specifications
- Lighting concepts
- Luminaire selection according to project-specific demands
- Positioning of luminaires via Dialux
- Dimensioning luminaire luminous flux
- Selection, types and number of lamps
- Inputting planning parameters
- Calculation of lighting system, calculation parameters
- Control and analysis of planning results

**Dates/time**  
Wednesday, 28/09/2016 Chelmsford 9.30 am - 4.00 pm  
Wednesday, 14/09/2016 Leeds 9.30 am - 4.00 pm

**Certificate**

**DIALUX INTRODUCTION – WITH EVO PREVIEW**

**Target group**  
Graduates and newcomers to Lighting Design

**Number of participants**  
Maximum of 15

**Learning aim**  
The seminar will teach you the basics of indoor lighting design using DIALux planning software. Basic lighting design work will be carried out with the help of step-by-step tutorial utilising typical project examples. This course will also provide a short 1 hour module on DIALux EVO to give you a brief insight into what can be achieved with the new software.

**Contents**  
- EN 12464-1 planning specifications
- Lighting concepts
- Luminaire selection according to project-specific demands
- Positioning of luminaires via Dialux
- Dimensioning luminaire luminous flux
- Selection, types and number of lamps
- Inputting planning parameters
- Calculation of lighting system, calculation parameters
- Control and analysis of planning results  
  ➞ correcting input parameters
- Introduction to DIALux EVO

**Dates/time**  
Wednesday, 12/10/2016 Chelmsford 9.30 am - 4.00 pm

**Certificate**  
Participation certificate

Webinars
Education and training conveniently from your home or workplace: online seminars by the TRILUX Akademie are not only highly convenient but also reduce effort in terms of travel, time and costs. Participants are informed in virtual seminar rooms about the latest light and lighting themes in less than one hour.

To fully exploit the possibilities of this online format, events are carried out by technical specialists having supplementary training as certified e-trainers. An important methodological element of the webinars is interactivity, meaning that online participants also have the opportunity to ask specific questions about the topic.

<table>
<thead>
<tr>
<th>Duration</th>
<th>approx. 1 hour</th>
</tr>
</thead>
<tbody>
<tr>
<td>Location</td>
<td>The webinar is live at your own desk.</td>
</tr>
<tr>
<td>Technical preconditions</td>
<td>You need Internet access, telephone or VoIP (microphone and loudspeaker or headset).</td>
</tr>
</tbody>
</table>
Target group: Electrical consultants, contractors, facility managers, operators of lighting systems

Learning aim: Light users are confronted with a wide diversity of performance promises for LED products – but how far can you trust these? This webinar will inform you about the content, practical relevance and user benefits of the new ‘ENEC+’ designation.

Contents:
- Basics of the performance standard for luminaires
- Requirements of LED luminaires
- Measurement values
- User benefits
- ENEC+ as a tender characteristic?

Dates/time: Wednesday, 21/09/16, 1.00 - 2.00 pm

---

Target group: Electrical Consultants and Contractors, as well as End-users, Educators and Healthcare professionals

Learning aim: Light functions as a synchroniser for our inner clock and light has an activating effect. This webinar will inform you about which non-visual effects light has on us and our circadian rhythm, and how it influences our performance capability.

Contents:
- 24 hours: the human circadian rhythm
- Controlled by hormones: activity and relaxation
- The master clock: our inner clock
- The sun as an example: biologically effective light

Dates/time: Wednesday, 05/10/16, 1.00 - 2.00 pm

---

FORM & FUNCTION: LIGHT IN ARCHITECTURE

Target group
Lighting designers, electrical consultants, architects and everyone interested in implementing lighting.

Learning aim
The relationship between Light and Architecture is not always as seamless as planners would hope it to be. This webinar will give you a clearer understanding of how light can be utilised to enhance a space and accurately present the objects within it.

Contents
• Focusing on how light reacts to different spaces, surfaces and colours
• How light might be used to add to the dynamic appearance of a space
• Can improve the quality of light sources and their ability to reproduce colour accurately
• Considering how the updated LG7: Office Lighting, along with the latest research will impact the possibilities for the future

Dates/time
Wednesday, 16/11/16, 1.00 - 2.00 pm

BOOKING LINK
www.trilux-akademie.com/WEDE0535

Target group
Electrical & energy consultants, energy representatives

Requirements
Fundamental experience in lighting design

Learning aim
You will get to know the possibilities and operation of the TRILUX online efficiency calculator for lighting and also become familiar with the presetting of relevant parameters.

Contents
• What can the efficiency calculator do?
• Pre-settings and personalisation
• Configuring systems
• The influence of light management
• Calculation and evaluation
• Pay-back and total profit
• CO₂ evaluation
• Graphic display of results
• Report

Dates/time
Monday, 05/12/16, 1.00 - 2.00 pm

Lunchtime seminars (CPD)

Whilst all of our Akademie training can be logged as part of your Continuous Professional Development, our Lunchtime Seminars are specifically designed to meet that aim in the most convenient way possible for you.

We understand that your working day is already extremely full and so, as the name suggests, these seminars are held during your lunchbreak, taking no longer than an hour, with lunch provided by us. Our contact team will work with your company’s CPD organiser to make the booking and delivery of a Lunchtime Seminar in your premises seamless.

These free seminars are hosted by highly qualified technical experts, trained for teaching. Following the seminar all participants will receive a copy of the presentation and a CPD certificate via email. Please note that some of our seminars are CIBSE accredited, please look for the CIBSE logo in this program, whilst others require self-certification.
If we feel strengthened by the morning sun or relax when walking in the evening sun, this is not just imagined and is not accidental either, because sunlight changes its colour composition during the course of the day to control many biological processes in the human body. For example, the blue light component in the morning is especially high to provide an activating effect that promotes concentration. In the evening on the other hand, the blue component in sunlight lessens while red increases – the melatonin level and fatigue increase. Because people mostly spend their time in closed rooms though, these important impulses influencing the biological rhythm are often lost. Intelligent, biologically effective lighting solutions offer an alternative.

### Contents
- Focussing on human biological response to lighting.
- Recapping the biology of light and its effect on our circadian rhythms, human well-being and health.
- Case studies on lighting in education projects.
- Looking at research to improve the environment for elderly people & dementia wards.

### Duration
approx. 1 hour

### Certificate
Participation certificate

---

**LED TO THE PRESENT**

Seminar participants will receive an all-round overview of the technological features and requirements of LED in general lighting. Our expert will inform you about the technical status, the uses and applications as well as the future prospects of this technology.

### Target group
Design Engineers, Electrical Consultants, Lighting Designers, Contractors, Architects & Facility Managers

### Contents
- LED market and current development
- Forces driving LED forward, Standards
- Technical Basics
  - LED design, Electrical properties,
  - Light colour/binning, Optical Systems and usage,
  - LED Drivers, Thermal Management,
- Summary: 9 criteria for LED

### Duration
approx. 1 hour

### Certificate
Participation certificate
The world of Lighting is growing ever more complex, thanks in no small part to the arrival of LED technology. In this seminar our expert filters through the latest information and delivers it to you in a digestible form. This seminar focuses in particular on current planning standards as set out in EN 12464, the European code for the lighting of workplaces.

**Target group**
Design Engineers, Electrical Consultants, Lighting Designers, Contractors, Architects & Facility Managers

**Contents**
- An introduction to the European code for the lighting of workplaces
- Uniformity v Background
- Developing a scheme around a task or activity
- Cylindrical illumination and modelling
- Energy Savings
- Project examples

**Duration**
approx. 1 hour

**Certificate**
Participation certificate
The government’s Enhanced Capital Allowance Scheme encourages businesses to invest in specific energy-saving technology, by allowing you to offset equipment costs against taxable profits, providing a strong incentive to invest in energy-saving equipment, including LED lighting.

With the aid of case studies, our presenter will talk through the key points to consider when applying for the scheme and help you to overcome some of the barriers.

<table>

With the ENEC, Europe gained a uniform label for electrotechnical products regarding electrical, thermal and mechanical safety. The new ENEC+ label now certifies the credibility of product data, particularly with LED luminaires, by a neutral inspection authority. In the seminar our experts give an overview of the following:

TRILUX AKADEMIE UK

THE BEST ENVIRONMENT FOR ACHIEVING YOUR POTENTIAL
Fresh ideas need room – and the better the room is designed the easier it is to think and learn.

The TRILUX Akademie is equipped according to the very latest standards, also at the Chelmsford site, and bright and friendly lighting in each room shows how ideal light helps towards a highly pleasant atmosphere for learning. The right surroundings are waiting for you for every topic: display areas, training and meeting rooms and work areas for practical experiences.
